#### Research Projects (Major Grants/Research Collaboration)

### ***An ICAIARF funded research on valuation of intangibles***

The research involves examination of current methods of valuing intangible assets with the objective of developing a deep understanding about intangible assets, its characteristics, kind of disclosures required in financial reporting and issues related to its valuation. A user friendly return on asset model was developed to value intangibles of a firm that will help investors take more informed and better investment decisions. The study identified disclosure requirements in relation to intangible assets that would provide users of financial reports better understanding of the company – its strength and weaknesses, future performance, competitive sustaining power and its current and future value.

***Under the aegis of National Coordinated program a study on Diversity and the Effective Board :-*** The study examined the various aspects of diversity affecting corporate boards, in terms of gender, age, nationality, tenure, education, experience, and personalities. It describes the need for diversity in each category, as well as concerns that may arise from such diversity
