CONCEPT NOTE

Extreme weather events and mega disasters are one of the great challenges of our present age. Climate change, rapid urbanization and population growth in hazard-prone cities and coastal areas make action all the more urgent in the scope of disaster risk reduction and resilience. The scale of vulnerability and exposure to disasters and the resulting demand for assistance and protection are projected to increase substantially over the next decades. This is due to a combination of climate risk, resource scarcity and drought, ecosystem degradation, livelihoods' impoverishment, demographic changes, and limited capacities to manage risks from natural, technological and biological hazards, including epidemic diseases. The present scenario calls for disaster risk reduction and resilience strategies to mitigate the hazards brought about by the impending disasters and at the same time calls for synergies and partnerships between various key stakeholders to work on the common grounds of disaster risk reduction.

ABOUT THE TRAINING PROGRAM

This training will impart intensive knowledge and skills about various aspects connected to disaster management. The discussions will include fundamental concepts of disaster management, governance and institutional infrastructure system in the country. The sessions will be helpful to learn about vulnerabilities, risks, how emergency operations work and innovations that are taking place in disaster risk reduction practices. This training will also give updates about response, resilience and legal framework of disaster management.

ABOUT THE HOST ORGANISATIONS

NATIONAL INSTITUTE OF DISASTER MANAGEMENT

The National Institute of Disaster Management (NIDM) was constituted under an Act of Parliament with a vision to play the role of a premier institute for capacity development in India and the region. The efforts in this direction that began with the formation of the National Centre for Disaster Management (NCDM) in 1995 gained impetus with its re-designation as the National Institute of Disaster Management (NIDM) for training and capacity development. Under the Disaster Management Act 2005, NIDM has been assigned nodal responsibilities for human resource development, capacity building, training, research, documentation and policy advocacy in the field of disaster management. NIDM provides Capacity Building support to various National and State level agencies in the field of Disaster Management & Disaster Risk Reduction.

SHAHEED BHAGAT SINGH COLLEGE

Shaheed Bhagat Singh College is one of the leading colleges of the University of Delhi. It has been imparting higher education for more than 50 years by providing a vibrant and intellectually stimulating academic environment and promoting independence of thought and vision. Shaheed Bhagat Singh College, named after one of India's revolutionary sons, Shaheed-e-Azam, Sardar Bhagat Singh was established as a co-educational institution in 1967 as a constituent college of University of Delhi. The College takes pride in having accomplished faculties in eight departments ; and centres such as Centre for Disaster Management, Skill Development Centre and Centre for Shaheed Bhagat Singh Studies and Research are contributing well. The college is fully equipped with a digital library, computer labs and Geography lab with impressive infrastructure. Over a period of fifty years, the college has distinguished itself in diverse academic and professional fields by providing a vibrant and intellectually stimulating academic culture and promoting independence of thoughts and visions.

CENTRE FOR DISASTER MANAGEMENT STUDIES

The Centre for Disaster Management Studies (CDMS) has been established in 2018. The Centre aspires to work as Centre of excellence in disaster management research, training and creating awareness for disaster preparedness, risk reduction and mitigation. The CDMS regularly organize events which include lectures, short-term courses, training and workshops for students, staff and other participants. It also takes up research projects and publications to address various aspects of disaster management. The Centre organizes events in collaboration with institutions and organizations working in the domain of disaster management.

WHO SHOULD ATTEND?

It is an interdisciplinary program and open to participants from all disciplines.

- Faculty members
- Research Scholars
- Staff members
- University Students
- Professionals and Practitioners

Course Schedule		
October 21-23 , 2021 2:00 PM to 4:00 PM		
Date	Theme	Resource Person
